

**TENSION
LEVELING
TECHNOLOGY
FROM ANOTHER
WORLD...**

THE SECRET IS OUT.

THE SES SUPER LEVELER HAS ARRIVED.

The truth is revealed: problem free processing of advanced high strength steels.

With other-worldly strip tension of 280,000 LBF+, the new SES Super Leveler provides the ability to tension and accurately elongate the strip during processing. The unique SES BTU Bridle design supplies up to 300% more tension while reducing threading times, enhancing productivity and minimizing yield loss.

Whether a new line or upgrade of an existing line, the SES Super Leveler with BTU Bridles will efficiently process heavier, advanced high strength material. Get flatter, more dimensionally accurate product with reduced residual stresses.

SES is the exclusive provider of the BTU Bridle in the North American universe.

Call us today—we'll let you in on the secret.
